TOXICOLOGY

Volume contents

Volume 129 (1998)

Biomarkers in toxicology
J.A. Timbrell (UK) 1–12
Experimental studies on immunosuppression: how do they predict for man?
J.G. Vos, H. Van Loveren (The Netherlands) 13–26
Value of animal models for predicting hypersensitivity reactions to medicinal products
G. Choquet-Kastylevsky, J. Descotes (France) 27–35
Epidemiology studies in immunotoxicity evaluations
R.E. Biagini (USA) 37–54
Cytokine assays in human sera and tissues
J.A.D. Bienvenu, G. Monneret, M.C. Gutowski, N. Fabien (France) 55–61
Biomarkers of immunotoxicity in fish and other non-mammalian sentinel species: predictive value for mammals?
J.T. Zelikoff (USA) 63–71
Application of immunologic methods in clinical trials
W.C. Buhles (USA) 73–89
Results of a cyclosporin A ringstudy
H.-B. Richter-Reichhelm, A.E. Schulte (Germany) 91–94

Phencyclidine block of Ca^{2+} ATPase in rat heart sarcoplasmic reticulum
The enzyme is inhibited both in vivo and in vitro
M. Pande, J.A. Cameron, P.J.S. Vig, D. Desaiah (USA) 95–102
Marine biomolecules inhibit rat brain nitric oxide synthase activity
Among several agents tested, only two were found to have depolarizing effects in nerve fibers
J. Venkateswara Rao, D. Desaiah, P.J.S. Vig, Y. Venkateswarlu (USA, India). 103–112
Antimony trichloride induces DNA damage and apoptosis in mammalian cells
Cells in culture are affected at four hours of exposure to submillimolar concentrations
H. Huang, S.C. Shu, J.H. Shih, C.J. Kuo, I.D. Chiu (Taiwan, ROC) 113–123
Ethanol does not increase the hepatotoxicity of cocaine in primary rat hepatocyte culture
Phenobarbital, but not cocaine enhanced cocaine toxicity
M.L. Figliomeni, M.S. Abdel-Rahman (USA). 125–135
Liver nuclear ethanol metabolizing systems (NEMS) producing acetaldehyde and 1-hydroxyethyl free radicals
Production of free radical close to nuclear DNA may be of toxicological significance
G.D. Castro, A.M.A. Delgado de Layño, J.A. Castro (Argentina). 137–144
Localization of cytochrome P4501A1 and covalent binding of a mutagenic heterocyclic amine in blood vessel endothelia of rodents
Immunohistochemistry show localization in endothelial after induction by β-naphthoflavone
A. Annas, E.B. Brittebo (Sweden). 145–156
Plasma cadmium–metallothionein, a biological exposure index for cadmium-induced renal dysfunction, based on the mechanism of its action
A possible mechanism of action is proposed
K. Nomiyama, H. Nomiyama, N. Kameda (Japan) 157–168

Investigations of the pathways of toxicity of methyl iodide in the rat nasal cavity
Comparatively extensive GSH conjugation and its metabolic consequences may be decisive in selective olfactory toxicity
M.P. Chamberlain, E.A. Lock, C.J. Reed (UK). 169–181
Adaptation to oxidative stress: effects of vinclozolin and iprodione on the HepG2 cell line
Glutathione seems to be essential in the adaptation to oxidative stress
S. Radice, L. Marabini, M. Gervasoni, M. Ferraris, E. Chiesara (Italy). 183–191
Selective induction of cell-associated interleukin-1α in murine keratinocytes by chemical allergens
Contact skin sensitizers, in contrast to chemical irritants, induce cell-associated IL-1 production
E. Corsini, A. Primavera, M. Marinovich, C.L. Galli (Italy) 193–200
Effects of prolonged exposure to morphine and methadone on in vivo parameters of immune function in rats
Morphine, but not methadone induced slight immune suppression in rats
E.J. De Waal, J.W. Van Der Laan, H. Van Loveren (Netherlands) 201–210
Differential induction of apoptosis in activated and resting T cells by 2,3,7,8-tetrachlorodibenzo-*p*-dioxin (TCDD) and its repercussion on T cell responsiveness[1]
TCDD inhibits the proliferative response of activated, but not resting, T-cells
S.J. Pryputniewicz, M. Nagarkatti, P.S. Nagarkatti (USA) 211–226
Airborne house dust elicits a local lymph node reaction and has an adjuvant effect on specific IgE production in the mouse
Indoor suspended particular matter induces popliteal lymph node response and exerts adjuvant activity on the IgE response to ovalbumin
H. Ormstad, P.I. Gaarder, B.V. Johansen, M. Løvik (Norway). 227–236

Author index. 237
Subject index. 239–241
Volume contents. 243–244
